

ANNEXE 2

Overview of objectives, relevant strategies, sources of funding and stakeholders

Table 1 Hierarchy of objectives of the NOPL CR 2030 and their links to relevant strategies, representation of stakeholders, definition of possible sources of funding and compliance with the EBC Plan

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
1. The effectiveness of all phases of prevention is increased and cancer is prevented	1.1 Increase positive motivation for lifestyle change, health literacy and prevention of cancer caused by infections	1.1.1 Reduce dependence on harmful addictive substances and increase access to addiction treatment		MoH, health insurance companies	Strategic Objective 1 Specific Objective 1.2 Disease prevention, health promotion and protection; increasing health literacy	National Strategy for the Prevention and Reduction of Damage Associated with Addictive Behaviour 2019–2027	3. Saving lives through sustainable cancer prevention
		1.1.2 Improve the effectiveness of primary prevention tools and health literacy	Operational Programme Employment+ – now, for example, the project Systematic Education and Increasing Health Literacy of the Population through the NHIP is being prepared by the IHIS	MoH, IHIS, NIPH	Strategic Objective 1 Specific Objective 1.1 Primary care reform (1.1.9; 1.1.10) Specific Objective 1.2 Disease prevention, health promotion and protection; increasing health literacy (1.2.3; 1.2.4; 1.2.5; 1.2.6)		3. Saving lives through sustainable cancer prevention

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
1. The effectiveness of all phases of prevention is increased and cancer is prevented	1.1 Increase positive motivation for lifestyle change, health literacy and prevention of cancer caused by infections	1.1.3 Increase the effectiveness of preventive cancer vaccination programmes		NIPH	Strategic Objective 1 Specific Objective 1.2 Disease prevention, health promotion and protection; increasing health literacy (1.2.7)		3. Saving lives through sustainable cancer prevention – Preventing cancer caused by infections
	1.2 Increase the efficiency of early cancer detection	1.2.1 Enhance the effectiveness of existing population-based screening including the use of innovative approaches	National Recovery Plan – Component 6.2	IHIS – National Screening Centre	Strategic Objective 1 Specific Objective 1.2 Disease prevention, health promotion and protection; increasing health literacy (1.2.7)		4. Improving early detection of cancers
		1.2.2 Successful implementation of lung cancer screening	National Recovery Plan – Component 6.2	IHIS – National Screening Centre	Strategic Objective 1 Specific Objective 1.2 Disease prevention, health promotion and protection; increasing health literacy (1.2.7)		4. Improving early detection of cancers

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
1. The effectiveness of all phases of prevention is increased and cancer is prevented	1.2 Increase the efficiency of early cancer detection	1.2.3 Gradual introduction of new proven screening and early detection programmes for cancer	Operational Programme Employment+ – project plans now prepared by the IHIS: -colorectal cancer screening in men at risk, early detection of skin cancer in people at risk, prostate cancer screening	IHIS – National Screening Centre, MoH, health insurance companies	Strategic Objective 1 Specific Objective 1.2 Disease prevention, health promotion and protection; increasing health literacy (1.2.7)		4. Improving early detection of cancers
		1.2.4 Creation of special cancer prevention programmes for patients at risk (autoimmune diseases, HIV patients, congenital and acquired diseases/conditions with a higher risk of haemato-oncological disease)		IHIS - National Screening Centre, MoH, health insurance companies, health service providers	Strategic Objective 1 Specific Objective 1.2 Disease prevention, health promotion and protection; increasing health literacy (1.2.7)		

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
1. The effectiveness of all phases of prevention is increased and cancer is prevented	1.3 Increase the effectiveness of tertiary cancer prevention	1.3.1 Setting up a widely available dispensarisation system including the involvement of primary care physicians (among others, the prevention of subsequent cancer in already treated or cured cancer patients)		MoH, relevant health service providers, relevant companies of the CzMA JEP, IHIS/ National Screening Centre, health insurance companies	Strategic Objective 1 Specific Objective 1.1 Primary care reform (1.1.1, 1.1.9) Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care (2.1.1; 2.1.2; 2.1.3; 2.1.4; 2.1.5; 2.1.7; 2.1.8; 2.1.9)		4. Improving early detection of cancers 6. Improving the quality of life for cancers patients, survivors, and carers
		1.3.2 Develop and implement care programmes for groups of patients at high risk of developing further primary cancers after completion of treatment for malignancies		MoH, relevant health service providers, relevant companies of the CzMA JEP, IHIS/ National Screening Centre, health insurance companies	Strategic Objective 1 Specific Objective 1.2 Disease prevention, health promotion and protection; increasing health literacy		4. Improving early detection of cancers 6. Improving the quality of life for cancers patients, survivors, and carers
		1.3.3 Ensure continuous and long-term monitoring of the consequences of anticancer treatment		MoH, relevant health service providers, relevant companies of the CzMA JEP, IHIS/ National Screening Centre, health insurance companies	Strategic Objective 1 Specific Objective 1.1 Primary care reform (1.1.1, 1.1.9)		4. Improving early detection of cancers 6. Improving the quality of life for cancers patients, survivors, and carers

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
1. The effectiveness of all phases of prevention is increased and cancer is prevented	1.3 Increase the effectiveness of tertiary cancer prevention	1.3.4 Strengthen regular systematic monitoring of patients with the aim of early detection of disease relapse		MoH, relevant health service providers, relevant companies of the CzMA JEP, IHIS/ National Screening Centre, health insurance companies	Strategic Objective 1 Specific Objective 1.1 Primary care reform (1.1.1, 1.1.9)		4. Improving early detection of cancers 6. Improving the quality of life for cancers patients, survivors, and carers
		1.3.4 Strengthen regular systematic monitoring of patients with the aim of early detection of disease relapse		MoH, relevant health service providers, relevant companies of the CzMA JEP, IHIS/ National Screening Centre, health insurance companies	Strategic Objective 1 Specific Objective 1.1 Primary care reform (1.1.1, 1.1.9)		4. Improving early detection of cancers 6. Improving the quality of life for cancers patients, survivors, and carers
2. Patient-centred care leads to the highest possible quality of life during the illness, after curing and in the terminal phase	2.1 Ensure temporal and local availability of medical rehabilitation and follow-up care for cancer patients at all stages of the disease	2.1.1 Ensure the availability of follow-up and medical rehabilitation care (including social services) for cancer patients		MoH, MoLSA, relevant providers of health and social services, relevant associations of the CzMA JEP, health insurance companies	Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care (2.1.1; 2.1.2; 2.1.3; 2.1.4; 2.1.5; 2.1.7; 2.1.8; 2.1.9)		6. Improving the quality of life for cancers patients, survivors, and carers
		2.1.2 Increase the availability of psychosocial support and social services at all stages of the disease		MoH, MoLSA, relevant providers of health and social services, relevant associations of the CzMA JEP, health insurance companies	Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care (2.1.1; 2.1.2; 2.1.3; 2.1.4; 2.1.5; 2.1.7; 2.1.8; 2.1.9)	National Suicide Prevention Action Plan 2020–2030 National Mental Health Action Plan 2020–2030	6. Improving the quality of life for cancers patients, survivors, and carers

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
2. Patient-centred care leads to the highest possible quality of life during the illness, after curing and in the terminal phase	2.1 Ensure temporal and local availability of medical rehabilitation and follow-up care for cancer patients at all stages of the disease	2.1.3 Increase the availability of social services after cancer treatment		MoH, MoLSA, regions, relevant providers of health and social services, relevant associations of the CzMA JEP, health insurance companies			
	2.2 Ensure the availability of all forms of palliative care	2.2.1 Creation of the National Strategy for Palliative and End-of-Life Care	Operational Programme Employment+ – the project plan is now being prepared by the DH	MoH, MoLSA, regions, relevant societies of the CzMA JEP, providers of health and social services, health insurance companies, patient organisations, NGOs	Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care, mental health care reform	Concept of Home Care in the Czech Republic (2020) Nursing Concept (2021)	6. Improving the quality of life for cancers patients, survivors, and carers
		2.2.2 Development of general palliative care by inpatient care providers, home palliative care, and by primary care physicians	Operational Programme Employment+ – a project plan is now being prepared by the DH – a call for hospitals interested in introducing general palliative care	MoH, MoLSA, regions, relevant societies of the CzMA JEP, providers of health and social services, health insurance companies, patient organisations, NGOs	Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care, mental health care reform	Concept of Home Care in the Czech Republic (2020) Nursing Concept (2021)	6. Improving the quality of life for cancers patients, survivors, and carers

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
2. Patient-centred care leads to the highest possible quality of life during the illness, after curing and in the terminal phase	2.2 Ensure the availability of all forms of palliative care	2.2.3 Increase the availability of specialised palliative care (including mobile specialised palliative care teams - MSPC)	Integrated Regional Operational Programme 2021–2027 – Specific Objective 4.3	MoH, MoLSA, regions, relevant societies of the CzMA JEP, providers of health and social services, health insurance companies, patient organisations, NGOs	Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care, mental health care reform		6. Improving the quality of life for cancers patients, survivors, and carers
		2.3 Increase the involvement of patients and patient organisations	2.3.1 Increase patient involvement in co-decision making	MoH, patient organisations, relevant health service providers and their founders, relevant societies of the CzMA JEP	Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care, mental health care reform		6. Improving the quality of life for cancers patients, survivors, and carers
		2.3.2 Establishment and functioning of patient councils of CCCs	Operational Programme Employment+ – the Patient Rights Support Unit is currently preparing a project plan for the development of methodologies for the involvement of patients and patient organisations with care providers	MoH, patient organisations, relevant health service providers and their founders			6. Improving the quality of life for cancers patients, survivors, and carers

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
2. Patient-centred care leads to the highest possible quality of life during the illness, after curing and in the terminal phase	2.4 Setting up a system of lifelong care for cured paediatric patients	2.4.1 Continuous, long-term follow-up of patients after childhood cancer treatment, including the consequences of anticancer treatment and early therapeutic intervention to minimise them		MoH, PO, relevant health service providers and their founders, relevant societies of the CzMA JEP	Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care, mental health care reform		6. Improving the quality of life for cancers patients, survivors, and carers 8. Putting childhood cancer under the spotlight
3. The coordination of the entire cancer system is modern, efficient, and meets the needs of care providers and patients	3.1 Setting up the integration of prevention, cancer care and follow-up care systems	3.1.1 Promote effective collaboration between GPs, screening centres, CCCs and HOCs and ROG members and follow-up services, dispensarisation of cancer patients		MoH, relevant health service providers, relevant societies of the CzMA JEP	Strategic Objective 1 Specific Objective 1.1 Primary care reform (1.1.1; 1.1.5; 1.1.9) Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care, mental health care reform	Concept of Home Care in the Czech Republic (2020) Nursing Concept (2021)	2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 5. Ensuring high standards in cancer care

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
3. The coordination of the entire cancer system is modern, efficient, and meets the needs of care providers and patients	3.1 Setting up the integration of prevention, cancer care and follow-up care systems	3.1.2 Strengthen contractual cooperation of hospitals to establish regional and interregional networks of cancer therapy providers	Operational Programme Employment+	MoH, relevant health service providers, relevant societies of the CzMA JEP, zdravotní pojišťovny			7. Reducing cancer inequalities across the EU 6. Improving the quality of life for cancers patients, survivors, and carers 5. Ensuring high standards in cancer care
		3.1.3 Setting recommended patient pathways through the system, defining and implementing comprehensive standardised procedures to enhance timely access to care		MoH, relevant health service providers, relevant societies of the CzMA JEP	Strategic Objective 1 Specific Objective 1.1 Primary care reform (1.1.1; 1.1.5; 1.1.9) Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care, mental health care reform	Concept of Home Care in the Czech Republic (2020) Nursing Concept (2021)	5. Ensuring high standards in cancer care

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
3. The coordination of the entire cancer system is modern, efficient, and meets the needs of care providers and patients	3.1 Setting up the integration of prevention, cancer care and follow-up care systems	3.1.4 Support for the development and updating of clinical guidelines in relevant areas	Operational Programme Employment+ – the project is now being implemented by the Czech Health Research Council within the Operational Programme Employment	MoH, relevant societies of CzMA JEP, CHRC	Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care, mental health care reform	Concept of Home Care in the Czech Republic (2020) Nursing Concept (2021) National Suicide Prevention Action Plan 2020–2030 National Mental Health Action Plan 2020–2030	2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 5. Ensuring high standards in cancer care
		3.1.5 Establishment of prevention centres of CCCs	National Recovery Plan – Component 6.2 6.2.5 Establishment and development of a Cancer Prevention Centre and infrastructure for innovative and supportive care at the Masaryk Memorial Cancer Institute (only the Masaryk Memorial Cancer Institute)	MoH, CCCs, relevant health service providers, relevant societies of the CzMA JEP	Strategic Objective 1 Specific Objective 1.2 Disease prevention, health promotion and protection; increasing health literacy Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care, mental health care reform		2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 5. Ensuring high standards in cancer care

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
3. The coordination of the entire cancer system is modern, efficient, and meets the needs of care providers and patients	3.2 Ensure the development of personalised medicine	3.2.1 Promoting a multidisciplinary approach, including ensuring the availability of clinical trials (including academic trials)		MoH, CzMA JEP, relevant health service providers, health insurance companies	Strategic Objective 1 Specific Objective 1.1 Primary care reform (1.1.1; 1.1.5; 1.1.9) Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care (2.1.1; 2.1.2; 2.1.3; 2.1.4; 2.1.5; 2.1.7; 2.1.8; 2.1.9)	Concept of Home Care in the Czech Republic (2020) Nursing Concept (2021) National Suicide Prevention Action Plan 2020–2030 National Mental Health Action Plan 2020–2030	2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 5. Ensuring high standards in cancer care
		3.2.2 Increase the capacity of advanced molecular biological methods to enable personalised targeted therapy		MoH, relevant health service providers, health insurance companies			2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 5. Ensuring high standards in cancer care

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
3. The coordination of the entire cancer system is modern, efficient, and meets the needs of care providers and patients	3.2 Ensure the development of personalised medicine	3.2.3 Increase access to targeted personalised treatments, advanced radiotherapy and advanced surgical techniques, including minimally invasive surgery		MoH, CzMA JEP, relevant health service providers, health insurance companies			2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 5. Ensuring high standards in cancer care
	3.3 Improve planning and increase access to care	3.3.1 Develop and implement planning mechanisms in the light of regional care needs	Operational Programme Employment+ – the project plan Increasing accessibility of oncological and other healthcare through the use of automatic learning systems and artificial intelligence is now being prepared by the IHIS	MoH, relevant health service providers and their founders, IHIS, health insurance companies, regions	Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care (2.1.1; 2.1.2; 2.1.3; 2.1.4; 2.1.5; 2.1.7; 2.1.8; 2.1.9)	Concept of Home Care in the Czech Republic (2020) Nursing Concept (2021)	

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
3. The coordination of the entire cancer system is modern, efficient, and meets the needs of care providers and patients	3.3 Improve planning and increase access to care	3.3.2 Rationalisation of cost planning for cancer diagnostics and treatment (optimisation of reimbursement mechanisms)		MoH, relevant health service providers and their founders, IHIS, health insurance companies	Strategic Objective 2 Specific Objective 2.4 Optimisation of the reimbursement system in healthcare	Concept of Home Care in the Czech Republic (2020) Nursing Concept (2021)	2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 5. Ensuring high standards in cancer care
4. The fight against cancer is conducted to a high standard, in line with advances in science and new technologies	4.1 Ensure sufficient numbers of quality, qualified and motivated human capital in oncology	4.1.1 Ensure high quality vocational education – undergraduate		MoH, MEYS, NCN NMH, relevant professional societies of the CzMA JEP, relevant health service providers, medical faculties, secondary and higher medical schools	Strategic Objective 2 Specific Objective 2.2 Personnel stabilisation of the Ministry of Health (2.2.1; 2.2.8)	Nursing Concept, SO 1 – 1.2 Professional development of nurses/nursing team members in individual areas	2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 5. Ensuring high standards in cancer care

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
4. The fight against cancer is conducted to a high standard, in line with advances in science and new technologies	4.1 Ensure sufficient numbers of quality, qualified and motivated human capital in oncology	4.1.2 Ensure high quality and accessibility of vocational training – specialisation and lifelong learning		MoH, MEYS, IPME, NCN NMH, relevant professional societies of the CzMA JEP, relevant health service providers, universities, medical faculties	Strategic Objective 2 Specific Objective 2.2 Personnel stabilisation of the Ministry of Health (2.2.1; 2.2.2.; 2.2.3; 2.2.4; 2.2.5; 2.2.8)		2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 5. Ensuring high standards in cancer care
		4.1.3 Increase nurses' competences	Operational Programme Employment+ (Currently the NCN NMH is preparing e.g., the project plan Supervision and Competences of Nurses and other Non-medical Healthcare Professionals)	MoH, MEYS, IPME, NCN NMH, relevant professional societies of the CzMA JEP, relevant health service providers	Strategic Objective 2 Specific Objective 2.2 Personnel stabilisation of the Ministry of Health (2.2.1; 2.2.3; 2.2.4; 2.2.5; 2.2.6)	Concept of Home Care in the Czech Republic (2020) Nursing Concept (2021)	2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 5. Ensuring high standards in cancer care

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
4. The fight against cancer is conducted to a high standard, in line with advances in science and new technologies	4.1 Ensure sufficient numbers of quality, qualified and motivated human capital in oncology	4.1.4 Education of healthcare professionals caring for patients with cancer in special skills – nutrition, psycho-oncology, palliative care, ethics, psychosocial skills, multidisciplinary consensus, clinical pharmacy, etc	Operational Programme Employment+ – the IHIS has prepared the project plan Early Detection of Malnutrition in Cancer Patients	MoH, MEYS, IPME, NCN NMH, relevant professional societies of the CzMA JEP, relevant health service providers	Strategic Objective 2 Specific Objective 2.2 Personnel stabilisation of the Ministry of Health (2.2.1; 2.2.4; 2.2.6; 2.2.11) Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care	Concept of Home Care in the Czech Republic (2020)	2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 5. Ensuring high standards in cancer care
		4.1.5 Improve working conditions, including reconciliation of work and family life, reducing turnover in less exposed sectors	Operational Programme Employment+ – the NCN NMH is preparing e.g., the project plan Supervision and Competences of Nurses and other Non-medical Healthcare Professionals	MoH, relevant professional societies of the CzMA JEP, relevant health service providers	Strategic Objective 2 Specific Objective 2.2 Personnel stabilisation of the Ministry of Health (2.2.7; 2.2.10)	Concept of Home Care in the Czech Republic (2020) Nursing Concept (2021)	5. Ensuring high standards in cancer care

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
4. The fight against cancer is conducted to a high standard, in line with advances in science and new technologies	4.2 Improvement of the infrastructure of individual providers of oncological and haemato-oncological care	4.2.1 Support for the development of infrastructure and equipment of CCCs and HOCs (for adult and paediatric patients)	National Recovery Plan – Component 6.2	MoH, relevant professional societies of the CzMA, relevant health service providers and their founders, health insurance companies	Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care, mental health care reform		2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 7. Reducing cancer inequalities across the EU
		4.2.2 Support the development of regional care provider infrastructure	Integrated Regional Operational Programme 2021-2027 – Specific Objective 4.3	MoH, regions, relevant professional societies of the CzMA JEP, relevant health service providers and their founders, health insurance companies	Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care, mental health care reform		2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 7. Reducing cancer inequalities across the EU

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
4. The fight against cancer is conducted to a high standard, in line with advances in science and new technologies	4.2 Improvement of the infrastructure of individual providers of oncological and haemato-oncological care	4.2.3 Increase access to cancer care in specific regions	National Recovery Plan – Component 6.2	MoH, Motol University Hospital, regions (especially the KVK) relevant professional societies of the CzMA JEP, relevant health service providers and their founders, health insurance companies	Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care, mental health care reform		2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 7. Reducing cancer inequalities across the EU
	4.3 Monitor the quality of care at individual cancer care providers	4.3.1 Update and regularly validate cancer care indicator sets		MoH, IHIS, relevant professional societies of the CzMA JEP, providers of health and social services and their founders	Strategic Objective 1 Specific Objective 1.1 Primary care reform (1.1.1; 1.1.5; 1.1.9) Strategic Objective 2 Specific Objective 2.1 Implementation of integrated care models, integration of health and social care, mental health care reform	Concept of Home Care in the Czech Republic (2020) Nursing Concept (2021)	2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 5. Ensuring high standards in cancer care

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
4. The fight against cancer is conducted to a high standard, in line with advances in science and new technologies	4.3 Monitor the quality of care at individual cancer care providers	4.3.2 Introduce standardised evaluation by patient organisations		MoH, IHIS, relevant professional societies of the CzMA JEP, providers of health and social services and their founders, patient organisations		Concept for the involvement of patient organisations in MoH decision-making (in preparation)	5. Ensuring high standards in cancer care
	4.4 Ensure access to innovative practices and maintain high quality in cancer care	4.4.1 Accelerate the implementation of innovative procedures (including the category of inventions) in diagnosis and treatment		MoH, relevant health service providers and their founders, health insurance companies, SIDC, relevant professional societies of the CzMA JEP	Strategic Objective 2 Specific Objective 2.4 Optimisation of the reimbursement system in healthcare (2.4.10)		2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 5. Ensuring high standards in cancer care
		4.4.2 Extension of the Health Technology Assessment (HTA) mechanism to medical devices and medicines administered in hospitals		MoH, health insurance companies, SIDC, relevant professional societies of the CzMA JEP			

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
4. The fight against cancer is conducted to a high standard, in line with advances in science and new technologies	4.4 Ensure access to innovative practices and maintain high quality in cancer care	4.4.3 Strengthening the implementation of the DRG system, the exact valuation of the cost of cancer therapy and targeted mechanisms for reimbursement of care (payment according to cost – reimbursement tariffs)		MoH, IHIS, relevant health service providers and their founders, health insurance companies, SIDC, relevant professional societies of the CzMA JEP	Operational Programme Employment	National Policy, Government Programme Statement	5. Ensuring high standards in cancer care
	4.5 Promote research and international cooperation in oncology	4.5.1 Excellence in research and development, including academic research and academic clinical trials to improve the diagnostic and therapeutic process in oncology	National Recovery Plan – Component 5.1 Excellence in research and development in priority areas of public interest in the health sector Programme for the Support of Applied Health Research 2020–2026	MoH, CHRC, relevant health service providers, relevant professional societies of the CzMA JEP, academic and other educational and research institutions, NCC, ERN sites	Strategic Objective 3 Specific Objective 3 Involvement of science and research in the solution of the priority tasks in healthcare	National Research, Development and Innovation Policy of the Czech Republic 2021+ Programme for the Support of Applied Health Research 2020–2026 (1.3; 1.7)	2. A modern approach to cancer: new technologies, research and innovation at the service of patient-centred cancer prevention and care

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
4. The fight against cancer is conducted to a high standard, in line with advances in science and new technologies	4.5 Promote research and international cooperation in oncology	4.5.2 Define rare cancers and access to international clinical and basic research in collaboration with the EU		MoH, CHRC, relevant health service providers, relevant professional societies of the CzMA JEP, academic and other educational and research institutions	Specific Objective 3 Involvement of science and research in the solution of the priority tasks in healthcare		
		4.5.3 International cooperation and harmonisation of research and care within the EU and WHO	EU4Health programme	MoH, CHRC, relevant professional societies of the CzMA JEP, academic and other educational and research institutions, NCC, ERN sites	Strategic Objective 3 Specific Objective 3 Involvement of science and research in the solution of the priority tasks in healthcare		2.A Modern approach to Cancer: New technologies, research and Innovation at the service of patient-centred cancer prevention and care 10. International collaboration and coordination

Strategic Objective	Specific Objective	Sub-objective	Possible sources of funding for the sub-objective	Responsibility	Compliance with „Health 2030“	Other relevant strategic materials	Compliance with Europe's Beating Cancer Plan
4. The fight against cancer is conducted to a high standard, in line with advances in science and new technologies	4.6 Reaping the benefits of digitalisation	4.6.1 Involvement of cancer care in the implementation of eHealth and telemedicine		MoH, IHIS, relevant professional societies of the CzMA JEP, relevant health service providers and their founders, academic institutions and other educational and research organisations	Strategic Objective 2 Specific Objective 2.3 Digitalisation of healthcare (2.3.1; 2.3.2; 2.3.4; 2.3.7; 2.3.8; 2.3.9; 2.3.10; 2.3.12; 2.3.15)	National eHealth Strategy of the CR Strategic Framework for Healthcare Development in the Czech Republic until 2030 (Health 2030) IP 2.3 Digitalisation of healthcare	2.A modern approach to cancer: new technologies, research and Innovation at the service of patient-centred cancer prevention and care
		4.6.2 Support for the development of a parametric database, in particular the National Cancer Registry and related NHIS data sources		MoH, relevant professional societies of the CzMA JEP, relevant health service providers	Strategic Objective 2 Specific Objective 2.3 Digitalisation of healthcare (2.3.1; 2.3.2; 2.3.4; 2.3.7; 2.3.8; 2.3.9; 2.3.10; 2.3.12; 2.3.15)	National eHealth Strategy of the CR Strategic Framework for Healthcare Development in the Czech Republic until 2030 (Health 2030) IP 2.3 Digitalisation of healthcare	2.A modern approach to cancer: new technologies, research and Innovation at the service of patient-centred cancer prevention and care
