

Output	Key Deliverables
Output 1.1.1 - Countries enabled to provide high-quality, people-centred health services, based on primary health care strategies and comprehensive essential service packages	1. Strengthening Primary Health Care services through PHC demonstration platform, piloting multidisciplinary model for PHC services. 2. Strengthen and support sustainable financing for community based mental health services, support national mental health plan with focus on vulnerable groups, elderly, child and adolescents and for health care workers 3. Support Healthy ageing policies. 4. Address vaccination hesitancy
Output 1.1.2 - Countries enabled to strengthen their health system to deliver on condition and disease specific service coverage results	TB cascade of care reviewed, with focus on essential services and TB prevention and operational country plan developed on the strengthening the health system capacity on TB care delivery with focus on MDR-TB
Output 1.1.3 - Countries enabled to strengthen their health systems to address populations-specific health needs and barriers to equity across the life course	Improving access to healthcare for refugees and people displaced from Ukraine
Output 1.1.5 - Countries enabled to strengthen their health and care workforce	Strengthen health care workforce planning and education, improved retention and recruitment, address HCW needs in line with European Framework on HCW 2023-2030
Output 1.2.2 - Countries enabled to produce and analyze information on financial protection, equity and health expenditures and to use this information to track progress and inform decision-making	Equity-sensitive monitoring of financial protection and actionable evidence for universal health coverage: country report with recommendations on coverage, access and financial protection
Output 1.3.2 - Improved and more equitable access to health products through global market shaping and supporting countries to monitor and ensure efficient and transparent procurement and supply systems	Efficient and transparent procurement and supply systems with policy dialogue on related actions, support country leadership in Novel Medicines Platform
Output 1.3.5 - Countries enabled to address antimicrobial resistance through strengthened surveillance systems, laboratory capacity, infection prevention and control, awareness-raising and evidence-based policies and practices	Support to improve antimicrobial use through surveillance and strengthening laboratory and data management
Output 2.1.1 - All-hazards emergency preparedness capacities in countries assessed and reported	Support planning and adjusting national preparedness capacities through strengthening International Health regulation (IHR). Support development and updating of costed national action plans for health security
Output 2.1.2- Capacities for emergency preparedness strengthened	Develop regional tools and increase country and regional capacities to detect, report and respond to deliberate chemical, biological and radio-nuclear (CBRN) events.
Output 2.2.1.- Research Agendas, predictive models and innovative tools, products	Strengthen risk communication and community engagement (RCCE) capacities. Establish social listening systems at country level and develop, pilot and implement Infodemic Management guidance, systems and tools to detect and address infodemic risks.
Output 3.2.1 - Countries enabled to address risk factors through multisectoral actions	Technical and policy support to address NCD risk factors through WHO Best Buys 1. Accelerate Stop Obesity initiative through nutritional policies including sustainable healthy diets, trans fatty acids, sugar reduction, reformulating front of pack labelling, reinforced physical activity and through policies to address digital marketing of unhealthy products 2. Support Tobacco Control Policies
Output 3.2.2 - Countries enabled to reinforce partnerships across sectors, as well as governance mechanisms, laws and fiscal measures	Alcohol awareness and best buys, develop intersectoral dialogues on taxation, affordability, labeling and digital marketing, implementation of SAFER initiative
Output 3.3.1 - Countries enabled to address environmental determinants, including climate change	1. Climate change policies, support national health adaptation policies and plans to address the adverse health impacts of climate change. Support implementation of national portfolio of actions on environment and health 2. Support adaptation and translation of the age-friendly environments policy toolkit
Output 3.3.2 - Countries supported to create an enabling environment for healthy settings	Support for strengthening healthy cities network, piloting well-being economy policy lab: unlocking public and private investment for promoting health equity & well-being.
Output 4.1.1 - Countries enabled to strengthen data, analytics and health information systems to inform policy and deliver impacts	Health information system assessment tools, technical and policy support on improved data access, analysis; support implementation of ICD-11.
Output 4.1.2 - Surveillance population health	Capacity building on surveillance of population health adopted to country needs and addresses all the main steps in surveillance and health information system.
Output 4.1.3 - Strengthened evidence base, prioritization and uptake of WHO generated norms and standards and improved research capacity and the ability to effectively and sustainably scale up innovations, including digital technology, in countries	1. Support digital health solutions, provide technical advice, guidance on digital health projects (i.e. regulation, telemedicine, mHealth, digital health literacy, artificial intelligence). 2. Support evidence informed policymaking, science, research, innovation ecosystem, knowledge management.
